INTERNSHIPS

Glenair, Inc – Los Angeles, CA

June 2026 - Present

Software Development Intern

- Design backend features including CRUD operations, request validation with Pydantic, centralized exception handling, structured logging, authentication dependencies, and API testing using Swagger.
- Develop and implement backend applications in python using FastAPI, implementing RESTful APIs, layered architecture, and file-based data persistence.
- Support NIST 800-171 and CMMC Level 2 compliance initiatives while assisting with enterprise cybersecurity operations.

Public Defender's Office – Bloomington, IN

May 2025 – July 2025

Legal Intern

- Contributed to strategies in high-profile cases, including a murder trial and securing the dismissal of an F-1 felony charge.
- Conducted legal research on case law and precedents, contributing to successful motions and dismissals.
- Synthesized complex court transcripts and video evidence into concise analytical briefs to inform trial preparation, strategic decision-making, and inform overall defense strategy.

New Leaf, New Life – Bloomington, IN

May 2024 – July 2024

Intern

- Implemented new webpages, content updates, and interface improvements to enhance website functionality and usability
- Enhanced website functionality and content using HTML, CSS, and Python, creating a more accessible and user-friendly experience for staff and clients.
- Supported case managers in creating individualized reentry plans, highlighting support network and transitional housing plans.

PROFESSIONAL EXPERIENCE

Academic Fairness Committee – Indiana University Bloomington

June 2023 – August 2025

IUB Judicial Committee

- Resolved academic misconduct by investigating cases and applying appropriate sanctions.
- Analyzed confidential cases to assess academic appeals to ensure fair application of university policies.
- Reviewed complex grade appeals by identifying procedural errors, implementing corrective measures, and producing detailed case summaries that ensure fair outcomes and strengthen trust in university academic integrity standards.

Kroger – Bloomington, IN

June 2025 – September 2025

Lead E-Commerce

- Trained new associates, ensuring compliance with store procedures and maintaining high customer service standards.
- Independently ran the entire department when needed, balancing order fulfillment, inventory checks, and customer interactions.
- Oversaw day-to-day operations of the online grocery pickup department, including managing staff and delegating tasks during high-volume shifts of over 350 orders.

Research Assistantship with PhD Candidate – Indiana University Bloomington

January 2025 – July 2025

Data Analyst & Research Collaborator

- Applied interdisciplinary approaches to synthesize findings on social influences affecting adolescent behavior.
- Evaluated literature and synthesized empirical findings from meta-analytic studies on adolescent delinquency.
- Cleaned and analyzed quantitative datasets to identify behavioral patterns in adolescent delinquency, supporting thesis conclusions through evidence-based insights.

Innovation For Impact – Indiana University Bloomington

August 2024 – December 2024

Public Sector Innovation Researcher

- Partnered with the U.S. Army to research secure communication systems for military training environments.
- Designed and presented a prototype for secure masked communication based on stakeholder and operational needs.
- Conducted stakeholder interviews with 44 U.S. Army personnel to identify communication vulnerabilities and operational security requirements.
